

Gap Geophysics Australia

HDM

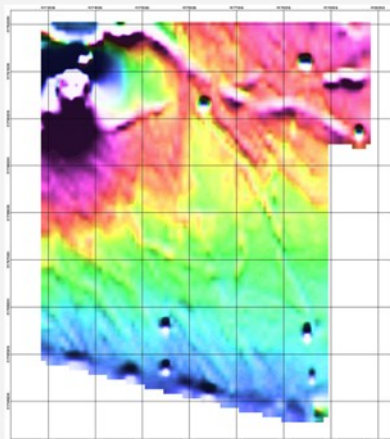

High Definition Magnetics

DESCRIPTION

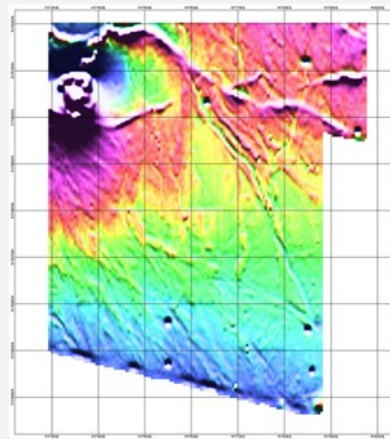

- ◇ Gap geophysicists have pioneered high definition, digital magnetometrics for mineral exploration, environmental, archaeological and UXO applications since 1980.
- ◇ We have a range of sophisticated instruments and platforms to suit most requirements.

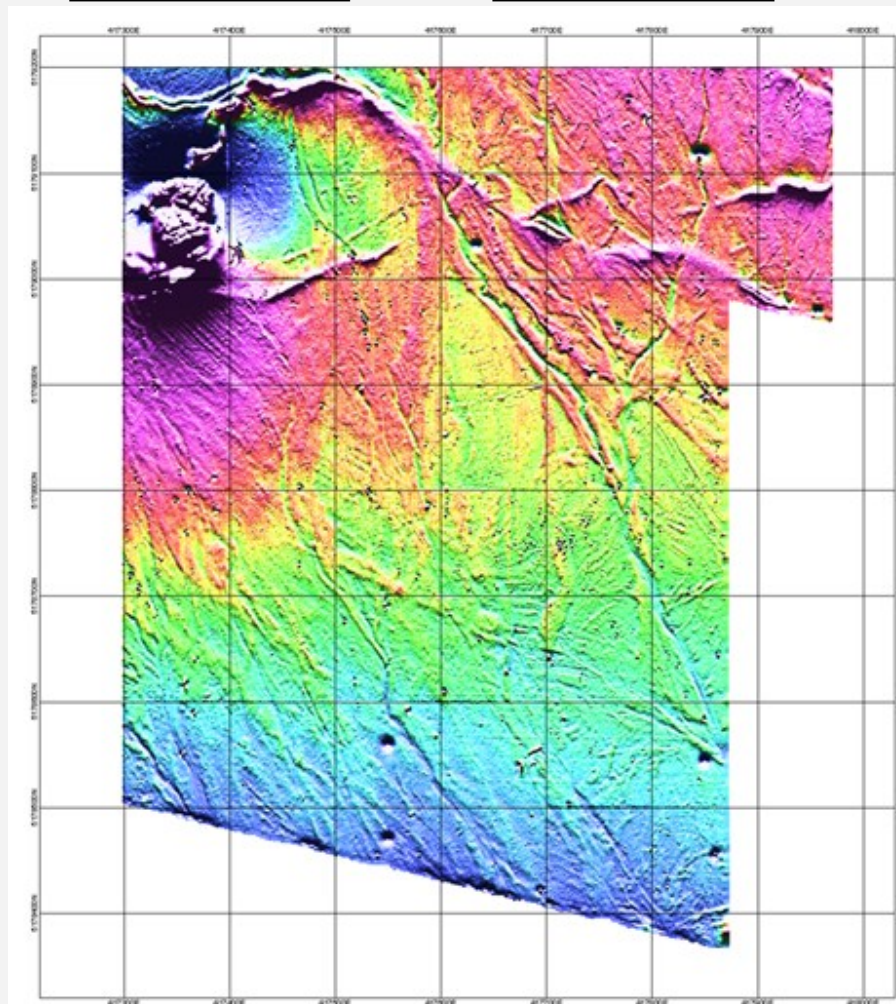

25m sample interval

10m sample interval

2.5m sample interval

Four sensor array

Eight sensor vehicle
towed array

UXO Survey Chevallier Ranch Montana, USA.

Line spacing: 0.5m
Sample Interval: 0.2m
Magnetometer: Gap TM-4
(quad sensor)
